Education

Montclair State University Expected May 2028
B.S. in Computer Science | GPA: 3.66 *Montclair, NJ*

- **Coursework:** Data Structures & Algorithms, Principles of Software Design, Computer Science Theory, Systems Programming, Computer Systems

Technical Skills

Languages: Python, Java, C; working knowledge with AI assistance: JavaScript/TypeScript, SQL, HTML/CSS
AI-Assisted Development: Claude Code, Codex, ChatGPT — directing, reviewing and testing AI-written code
Project Stack: React, Next.js, Node.js, Supabase, PostgreSQL, three.js, Azure, Cloudflare, Git, Blender
Concepts: REST APIs, Relational Databases, Authentication, Automated Testing, CI/CD, LLM Integration
Spoken Languages: English, Spanish (bilingual, NJ Seal of Biliteracy), Italian (intermediate, NJ Seal of Biliteracy)

Projects

Hobitual — **3rd Place, GirlHacks 2026 | Claude Code, three.js, Node.js, Azure, Gemini** Oct 2026

- **Placed 3rd of 197 hackers** at GirlHacks 2026 (NJIT, 24 hours, team of 3) with a mobile-first habit tracker live at hobitual.club: XP and levels, AI hobby plans, and a community feed
- Led the 3D character work: a **Blender CLI auto-rigger** (built with Claude Code) for AI-generated characters plus Mixamo animations, cutting model size **65% (4 MB → 1.4 MB)** for fast mobile loads
- Deployed on **Azure** (App Service, Azure SQL, Key Vault) with passwordless email-code auth, a **REST API** for LLM-generated hobby plans (Gemini), and CI via GitHub Actions

Gamify.Life | Claude Code, Next.js, TypeScript, Supabase, PostgreSQL 2026

- Designed and shipped, with Claude Code, a full-stack app that turns hobbies into an RPG: **121 skills across 10 hobbies** as prerequisite graphs, an XP ledger and quests, in a retro desktop-OS interface
- Server-authoritative **REST API**: validated commands commit through Postgres advisory locks so concurrent saves can't award XP twice, plus row-level security and **125+ automated tests**

nehemiaslandaverde.com — **Interactive 3D Portfolio | Claude Code, three.js, Blender, Cloudflare** 2026

- Designed an interactive **three.js** portfolio: a rigged 3D character, a hackathon coin you flick into a shooting star, and a shadow-lit loft with a clickable globe; supports touch and reduced motion
- Created the 3D character (Tripo, Mixamo, Blender) and set up hosting on **Cloudflare**: custom domain, DNSSEC, a strict Content-Security-Policy, self-hosted dependencies, and no trackers

Experience

Global Career Accelerator — Web Development Track Summer 2026 – Present
Podium Education, in partnership with Montclair State University *Remote*

- Ship deadline-driven front-end projects (HTML, CSS, JavaScript), including an interactive educational timeline, from scoping and wireframing through public deployment
- Earned four partner-designed certificates (Intel, L'Oréal, OpenAI, UNESCO) using AI-assisted workflows

Lifeguard / Swim Instructor — Team Lead on Shift May 2023 – Present
City of Union City *Union City, NJ*

- Lead and train a rotating lifeguard team under time and safety pressure; teach swimming to all ages

Leadership

ColorStack at Montclair State University — Founding Tech Lead Fall 2026 – Present
Chapter in formation; recognition proposal to university leadership in progress *Montclair, NJ*

- Founding an official **ColorStack** chapter to grow the pipeline of Black and Latinx students in computing; building the chapter website and recognition proposal
