Education

Montclair State University **Sept 2024 – Present**

Undergraduate Student, Computer Science | GPA: 3.664 *Montclair, NJ*

- **Coursework:** Data Structures & Algorithms, Principles of Software Design, Computer Science Theory, Systems Programming, Computer Systems, Java Programming, Python Programming

Technical Skills

Languages: TypeScript, JavaScript, HTML5, CSS3, Python, Java, SQL
Technologies/Frameworks: React, Next.js, Tailwind CSS, Supabase, PostgreSQL, three.js, Pixi.js, React Flow, Zod, Playwright, Vitest
Developer Tools: Git, GitHub, Vercel, Cloudflare, GitHub Pages, VS Code, pnpm, Blender, Mixamo, AI-assisted development (Claude, ChatGPT, Codex)
Spoken Languages: English, Spanish (bilingual, NJ Seal of Biliteracy), Italian (intermediate, NJ Seal of Biliteracy)

Experience

Global Career Accelerator — Web Development Track | HTML, CSS, JavaScriptSummer 2026 – Present

Podium Education, in partnership with Montclair State University *Remote*

- Ship graded, deadline-driven front-end projects end to end, from **scoping and wireframing** through **public deployment**
- Earned **four industry-partnered certifications** (Intel, L'Oréal, OpenAI, UNESCO) combining manual coding with **AI-assisted workflows**

Lifeguard / Swim Instructor — Team Lead on Shift **May 2023 – Present**

City of Union City *Union City, NJ*

- Lead and **train** a rotating lifeguard team, assigning coverage under **time and safety pressure**; teach swimming to students of **all ages**

Leadership

ColorStack at Montclair State University — Founding Tech Lead **Fall 2026 – Present**

Chapter in formation; recognition proposal to university leadership in progress *Montclair, NJ*

- Leading the effort to found an official **ColorStack** chapter at Montclair State to grow the pipeline of **Black and Latinx students in computing** on campus
- Designing and building the chapter **website and recognition proposal** to pitch to university administration

Projects

Gamify.Life | Next.js, React, TypeScript, Supabase, PostgreSQL, Pixi.js, Zod, Vercel **2026**

- Built and deployed a full-stack app that turns real-life hobbies into an RPG: **121 skills across 10 hobbies** as dependency graphs with AND/OR prerequisites and **safety gates**, an **XP ledger**, weekly quests, and achievements
- Designed a **retro desktop OS** interface: draggable, resizable windows, **React Flow** skill trees, animated **Pixi.js** wallpapers, and a code-native layered SVG avatar (**157 wardrobe items**, 3 builds, 4 views); fully responsive on mobile
- Engineered a **server-authoritative** progression engine shared by guest and cloud modes; the API validates every command with **Zod** and commits via Postgres **advisory locks** and **compare-and-swap**, so concurrent saves can't award XP twice
- Secured user data with **row-level security**, verified by running real migrations in-memory; wrote **125+ Vitest and Playwright tests** with automated **accessibility (axe)** checks on desktop and mobile; source at github.com/Neo-Land/Gamify-Life

nehemiaslandaverde.com — Interactive 3D Portfolio | three.js, Blender, Mixamo, globe.gl, Cloudflare **2026**

- Built an interactive **three.js** portfolio: a rigged 3D character walks with footstep ripples; one tap pushes the camera in, and a **drag-to-tear** boarding pass opens into a shadow-lit brick loft with a clickable, pinned **globe.gl** globe
- Created the character pipeline end to end: AI image-to-3D (**Tripo**), auto-rigging (**Mixamo**, 41 bones), and animation cleanup in **Blender**, exported as a 48.7k-face glTF with walk, idle and sit clips
- Deployed as a static site on **Cloudflare** with self-hosted, version-pinned dependencies, a strict **Content-Security-Policy** and HSTS, and no trackers; supports touch/swipe and reduced motion

Certifications

Global Career Accelerator (2026): Web Development (Intel), AI-Powered JavaScript (L'Oréal), AI Professional Skills (OpenAI), Intercultural Skills (UNESCO)
Anthropic (2026): AI Fluency & Claude 101
